

Custom Tools

For SolidWorks®

Industries using Custom Tools

Many different industries around the world have already taken advantage of using CustomTools. Take a look at some of our customer' portfolio:

Automotive	  
Construction	   
Consumer Goods	
Design Consultancy	  
Furniture	
Industrial Components	 
Machinery	  
Marine	
Medical Case	 
Aerospace/Defense	 
Oil & Gas	
Packaging	  

Automotive

- [Tamware](#) – Manufactures door solutions for transportation vehicles.
"CustomTools helped us to get unhandled chaos back to our hands and the link between the ERP system and CustomTools, implemented by ATR Soft Ltd, helps us to focus on designing. We are, especially, satisfied for quick and efficient support."
Engineering department, Tamware Ltd
- [VAK](#) – Manufactures transport equipment solutions for professional use (Trailers, hook lifts, transport bodies).
- [Etteplan](#) – Offers transportation & automotive solutions (Energy efficiency, emission control,...)

Construction

- [Green Automation](#) – Greenhouse automation and automating greenhouse products handling.
"CustomTools is in key role when we transfer our designed products to the purchase and production. On our project oriented operation that is important part of our business process. We have chosen CustomTools because of its configurability and its very large-scale features"
Tero Laakso, Product manager, Green Automation Ltd Oy
- [Paroc](#) – Develops energy efficient stone wool insulation solutions.
- [Galten Steel and Glas](#) – Provides solutions for balconies, stairs, railings, facades.
- [Stålkon](#) – Offers steel constructions (Stairs, balconies, barriers).
- [Hi-Con](#) – Offers a large portfolio of concrete solutions from bridges, balconies to port facilities.

Consumer Goods

- [Jumbo](#) – Supplies scaffolds, ladders and personal lifts.

Design Consultancy

- [Tammerneon](#) – Offers entire illuminated outdoor advertising solutions for businesses.
- [Hi-Con](#) – Creates concrete contemporary solutions in structural design.
- [Galten Steel and Glas](#) – Provides solutions for glass work and safety glass gate.

Furniture

- [Hi-Con](#) – Provides concrete products for outdoors and indoors (Tables, benches, playground).

Industrial Components

- [Etteplan](#) – Provides industrial equipment for the automotive, aeronautics, marine & defense industry.

- [Green Automation](#) – Irrigation and fertilizers systems for green houses.

Machinery

- [PMC Polarteknik](#) – Supplies machines with hydraulic and pneumatic components.
- [Linco](#) – Food processing machinery.
- [Tume-Agri](#) – Specialized in manufacturing farming machines (Drilling, seed and fertilising drills).
- [Etteplan](#) – Offers technical design and product solutions (Automation and instrumentation)

Marine

- [STX Europe](#) – Leading builder of cruise and offshore vessels.
“Customtools helped us to reduce 30% of the structural design hours by developing an excellent CustomTools based application to link our Solidworks 3D-CAD and Salvagnini CAM-systems. We are also very satisfied for the ATR Soft's service during the development, implementation and operation phases of our system.”
Ilkka Rytkölä, Manager RDI, STX Finland Cabins Oy

Medical

- [Laboratory Systems Group](#) – Specialized in laboratory and clean room equipment (Air cleaning systems, endoscope, fans,..).
- [Etteplan](#) – Provides services to medical technology and life science companies.

Aerospace/Defense

- [Metromatics](#) – Offers solutions to avionics and defense industries (Telemetry, computers, communications).
"I love the batch print option, such a time saving, it just finished creating 255 items in 2 hours what took me 3 days!!! Again congratulations on a great product; I still cannot believe it is not a standard SolidWorks supplied add-in"
Russell MacBean, Design Manager, Metromatics Pty Ltd
- [Almexa](#) – Provides structures including floor sections, bulkheads, landing gear struts, window frames, wing skins and seat tracks.
- [Etteplan](#) – Designs entire parts of aero plane structures, airframe and composite material

Oil & Gas

- [Eprofiil](#) – Manufactures large steel structures and equipment for the offshore oil and gas industry.

Packaging

- **Jomet** – Provides solutions for automatic packing and palletizing systems.
"CustomTools was a logical choice for us since it provides the same level of efficiency, flexibility, and technical support that we, in our turn, must deliver to our customers through our specific packing and palletizing solutions."
Bruno Lespinasse, Managing Director, Jomet Oy
- **Linco** – Offers packing equipment for poultry.
- **Green Automation** – Conveyors, packing table and machines for greenhouses products.
"CustomTools is in key role when we transfer our designed products to the purchase and production. On our project oriented operation that is important part of our business process. We have chosen CustomTools because of its configurability and its very large-scale features"
Tero Laakso, Product manager, Green Automation Ltd Oy
